

Risk Analysis Training Course

Changing the way you work...forever!

Occuhealth Ltd. can provide the facility for Display Screen Equipment (DSE) Individualized Self Risk Assessment Programmes and Workshops.

This practical programme is designed to train participants in the skills of effective self risk assessment which will enable each individual to carry out their own personal DSE assessment. This will benefit both the employee and the organisation and increase their awareness of poor Ergonomic positioning.

Objective:

On completion of this programme participants will be able to:

- Identify requirements needed to carry out risk assessment
- List the component principles of the process
- Distinguish between different hazards
- Apply risk assessment to common workplace scenarios

Programme and course details:

- Legislation and Self Risk assessment
- Task analysis
- Identification of Risks
- Identification of Controls
- Risk Analysis

Who Should Attend: All personnel

Assessment / Certification: Occuhealth Ltd. Certificate of Attendance
Features

Delivery Method: Presentation and Workshop and Self Questionnaires
